Here’s how a startup should work:

Don’t Fall in Love with Your Product or Service

- Offer your product for Free?
- Turn your product into a subscription ?
  - Or Rundle?
- Your product was DIY (Ikea like)

- Your product transformed into something else?
- Your product expired?
- What upgrades/add-ons can you offer?
- Your product as a luxury item?
- If you limit sales compared to demand?

Building prototypes and testing ideas

Technology Adoption Life Cycle

Early Market

Mainstream Market

THE CHASM

Innovators | **Early Adopters** | **Early Majority** | **Late Majority** | **Laggards**

Like New Things — Big Pain Points

Need complete and reliable solutions

Building Low-Fidelity Prototypes

Prototyping

The practice of building quick, inexpensive, and **rough study models** to learn about the desirability, feasibility, and viability of alternative value propositions and business models.

Prototyping

The practice of building quick, inexpensive, and rough study models to learn about the **desirability**, feasibility, and viability of alternative value propositions and business models.

Prototyping

The practice of building quick, inexpensive, and rough study models to learn about the desirability, **feasibility**, and viability of alternative value propositions and business models.

Prototyping

The practice of building quick, inexpensive, and rough study models to learn about the desirability, feasibility, and **viability** of alternative value propositions and business models.

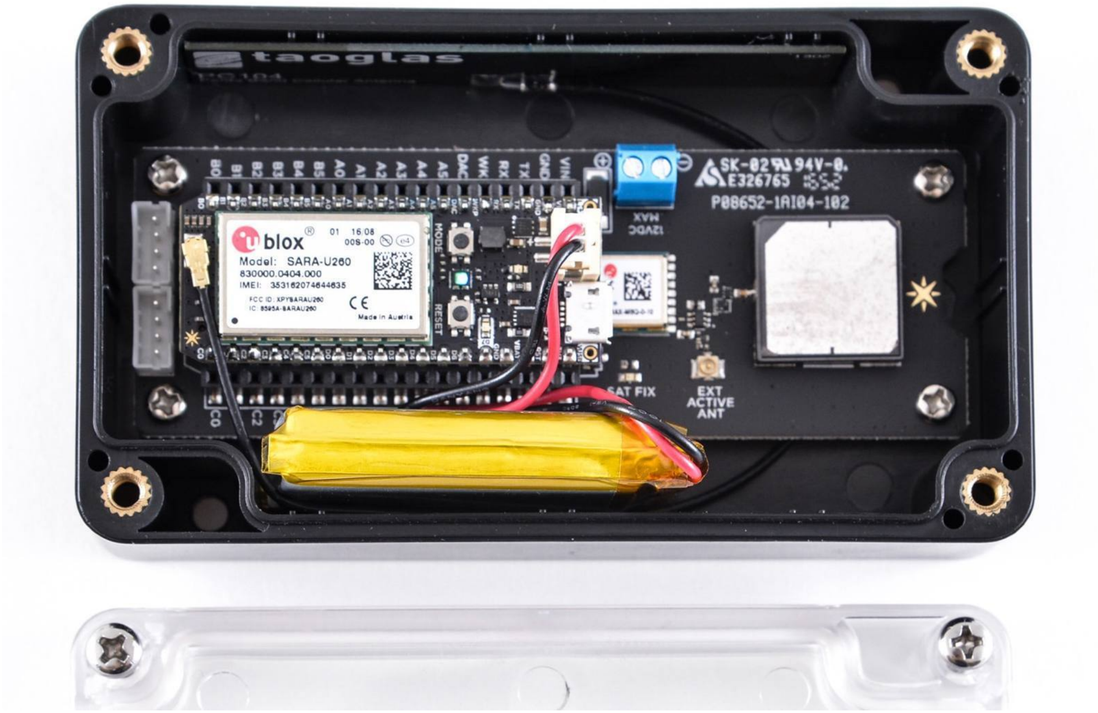

Why Prototype?

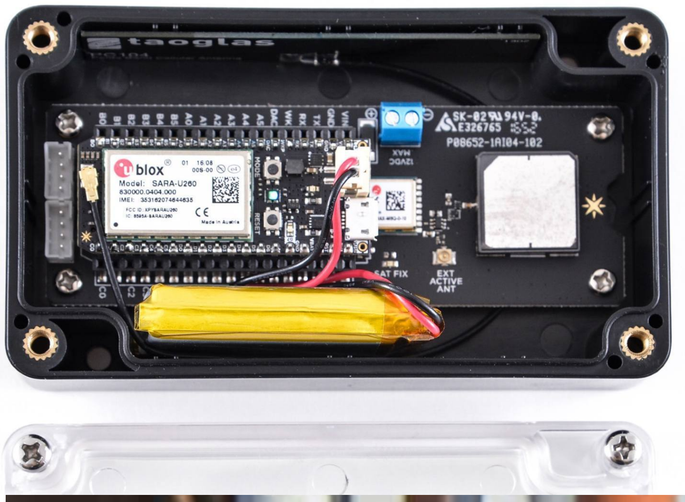

- Communicate
- Feedback
- Stress test
- Empathy
- Build excitement
- Brainstorm!

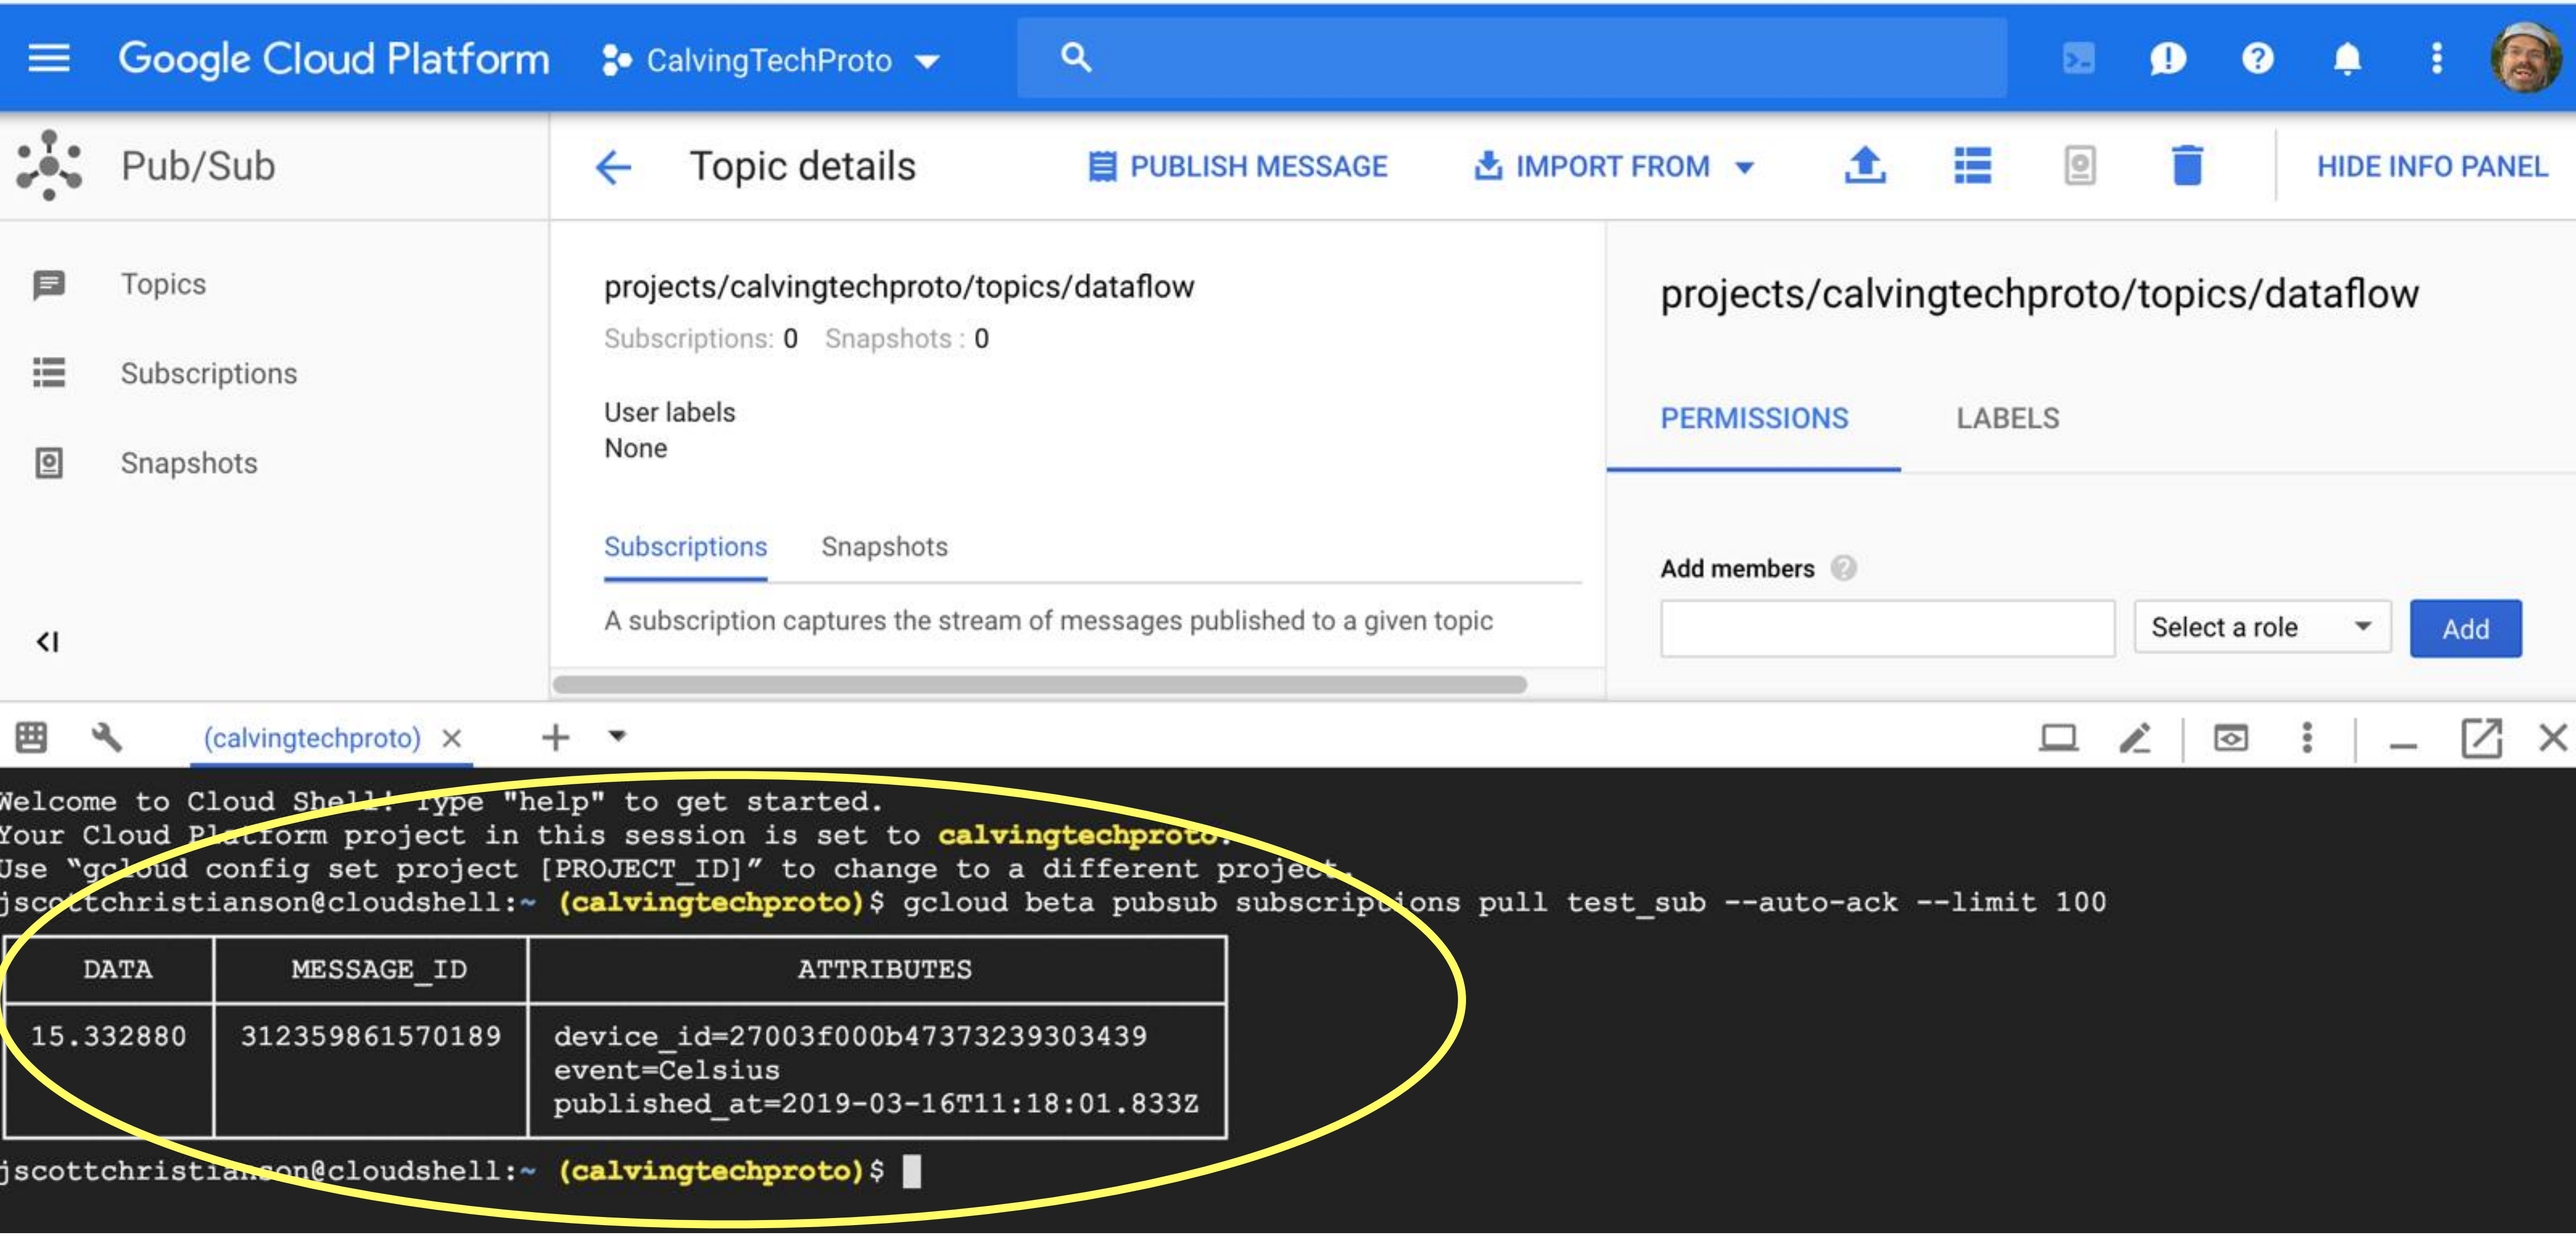

Building a Business with IoT Devices

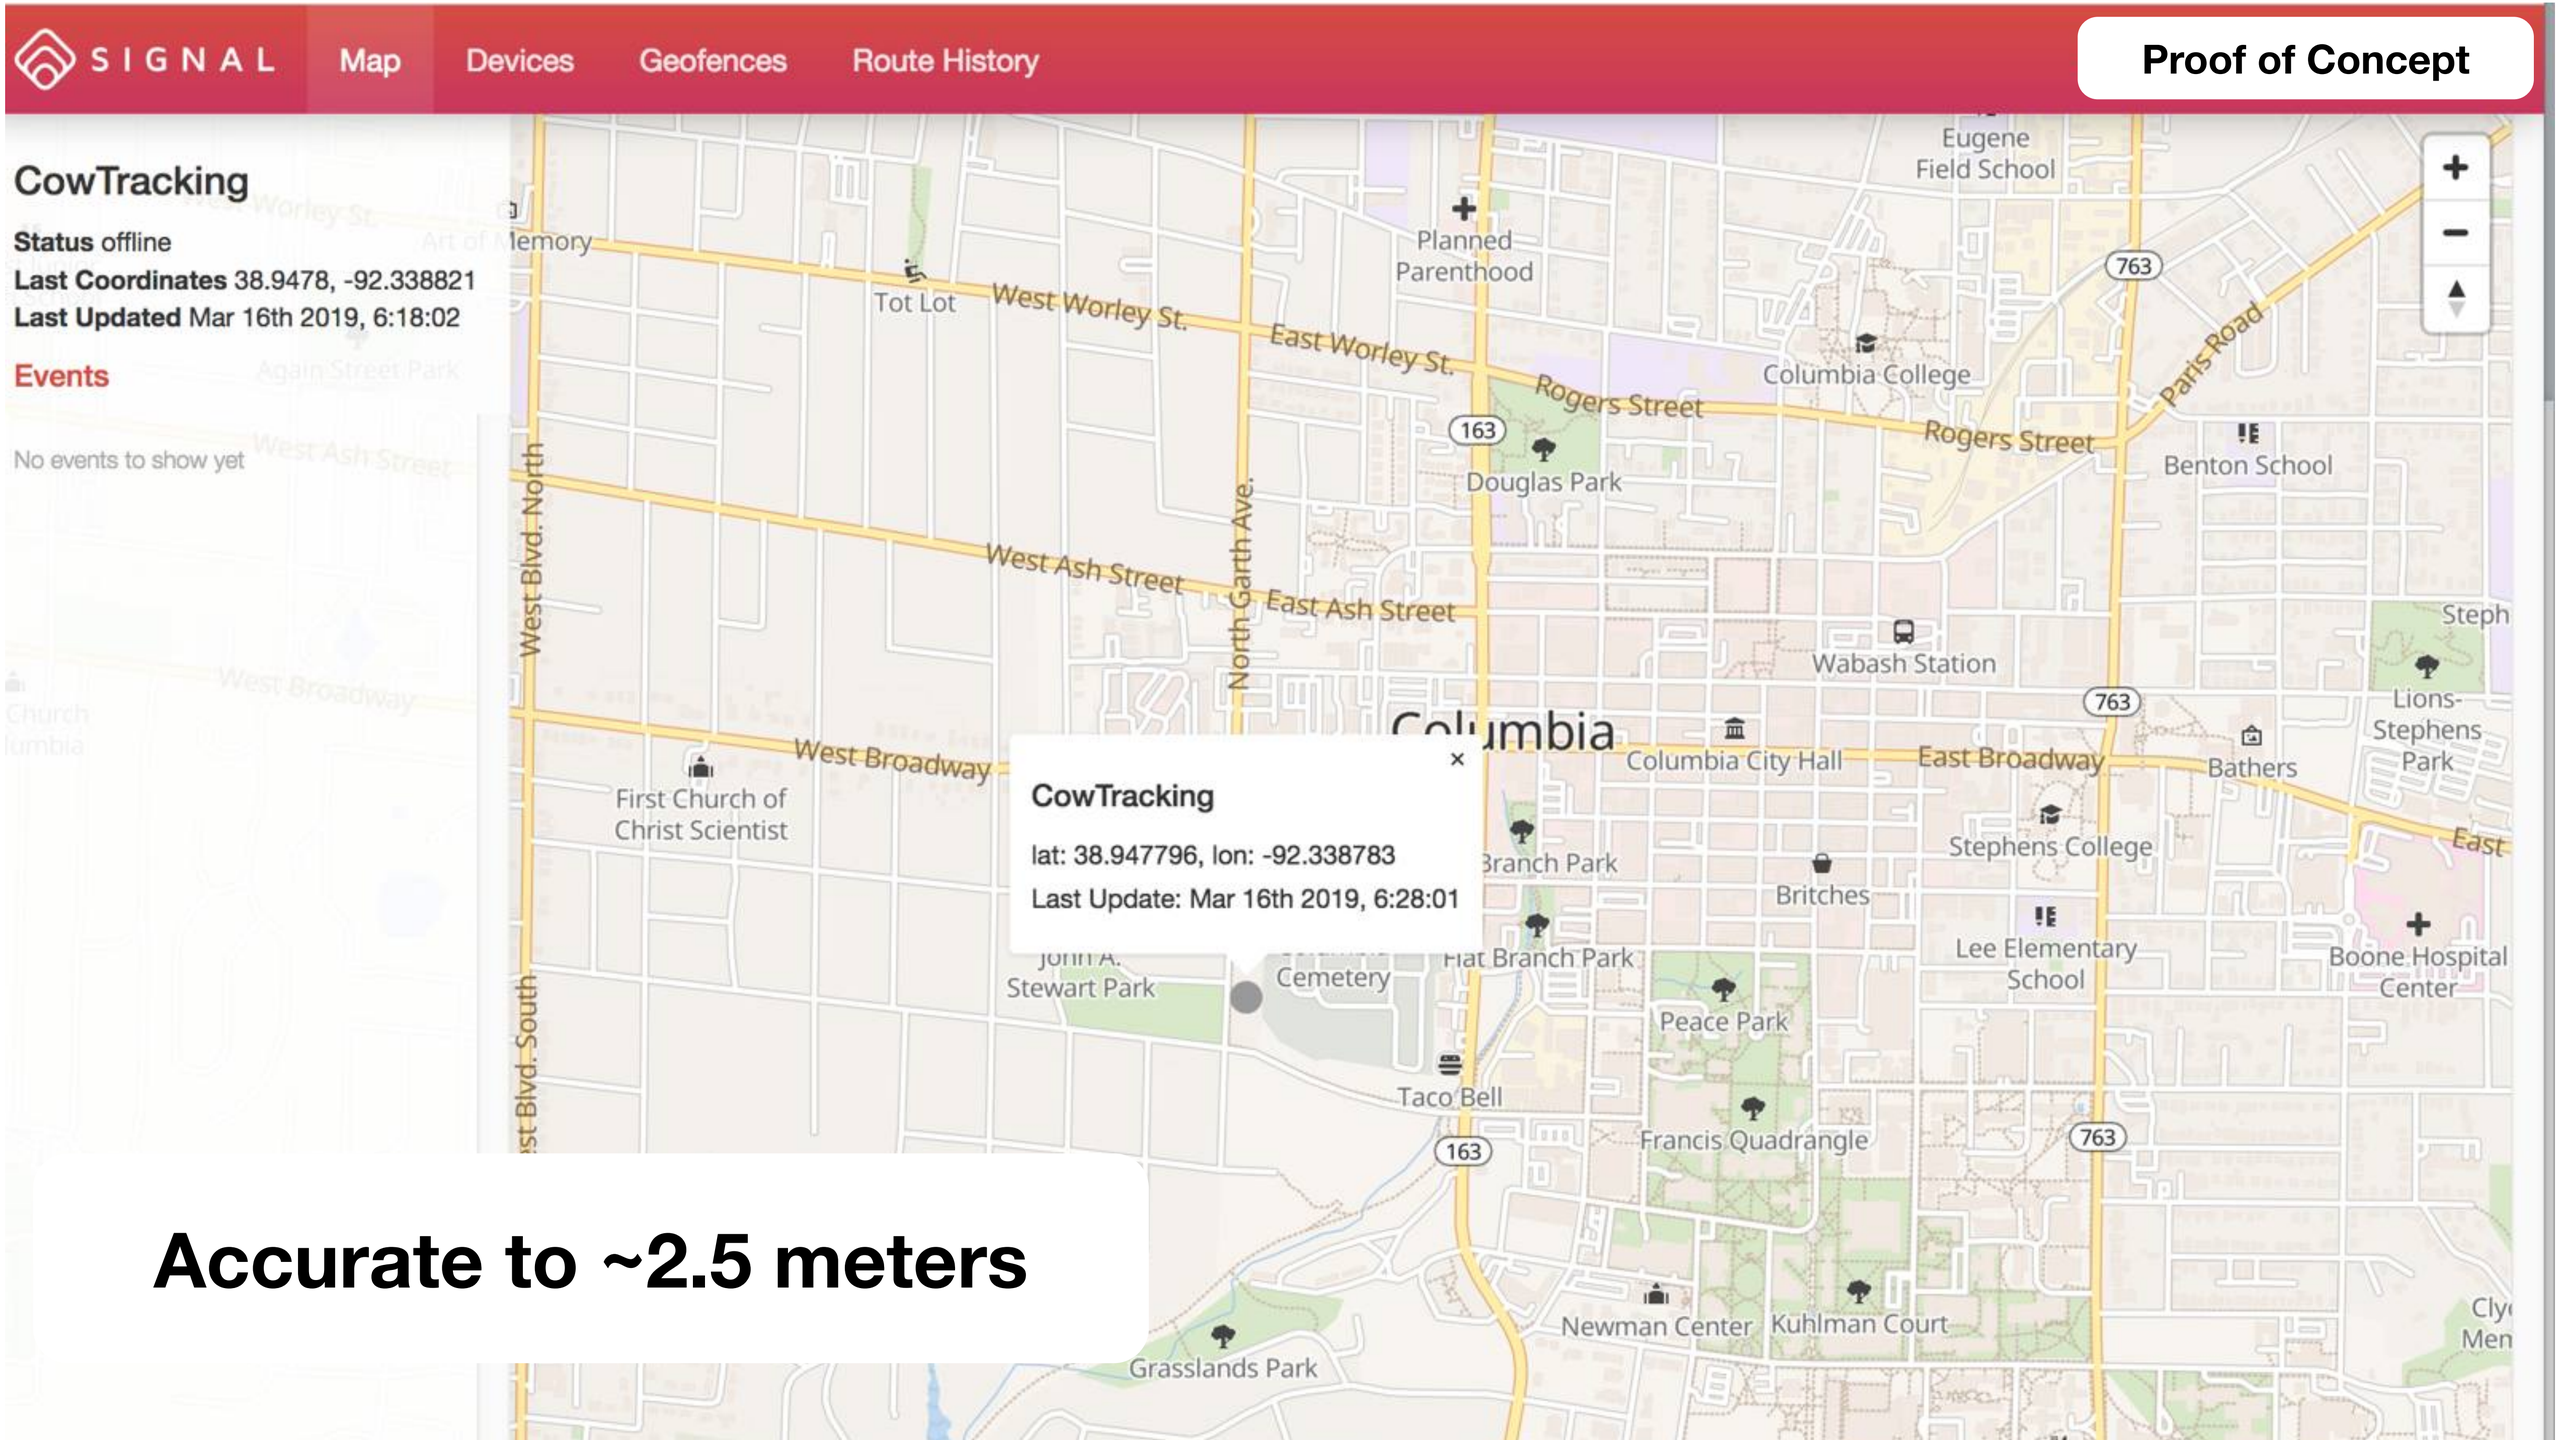

CALVING TECHNOLOGIES

- Options
- Design our a custom system, involve electrical engineers, programmers, etc.
- **Re-purpose an open source solution**

Types of Prototypes

- Static Prototype
  - Shows user interface but is hard coded with limited or no user interaction
- Scale Model
  - Used for large things (buildings) or process (factories)
- Story Board
  - Visualize the user experience.

Improved Platform

- Calendar feature for events
- Extra Crunch log in capability
- Targeted push notifications
- Detailed user insights

Improved Platform

Podcast capabilities and features

Pitch Advice

Pitch Advice: Graphics

Types of Product Innovations

Continuous Innovations

-little technological change

-minimal behavioral change

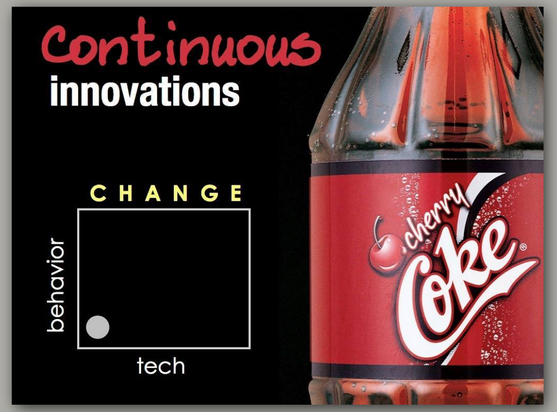

-line extensions such as Cherry Coke

Discontinuous Innovations

-major technological change

-large behavioral change

-exciting, high tech products (iPhone)

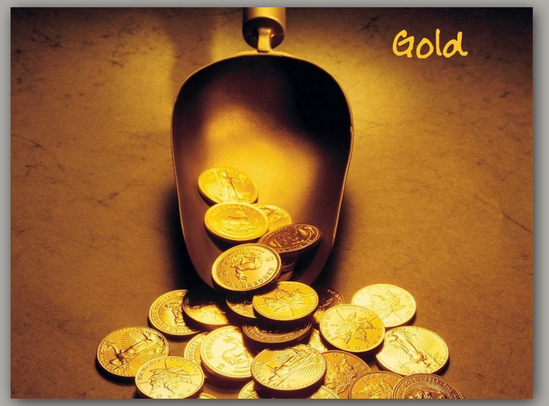

Variables and Reasoning

- Premium Gasoline
  - Considered a normal good
  - National Average to minimize regional differences
  - Hypothesis: more consumed during economic boom
- Gold
  - Likely increase during times of economic stress
  - Alternative to stocks, bonds, low interest accounts
  - Historically holds its value
  - Hypothesis: higher demand during economic downturns

Pitch Advice: Graphics

Underpricing of US stocks

Number of offerings, average first-day return, and gross proceeds of IPOs in 1975-2000

Year	Number of Offerings[1]	Average First-day Return,%[2]	Gross Proceeds, $ Millions[3]
1975-79	112	5.7	1,124
1980-89	2,348	6.8	62,596
1990-99	4,129	20.9	294,076
2000	385	55.5	66,100
TOTAL	6,974	17.8	423,896

Underpricing of US Stocks

Year	Number of offerings	Avg. 1st day return %	Gross proceeds ($M)
1975-79	112	6	1,124
1980-89	2,348	7	62,596
1990-99	4,129	21	294,076
2000	385	56	66,100
Total	6,974	18	493,826
